For those interested in enhancing skills as biomedical entrepreneurs

Gain valuable skills and knowledge about bringing new technologies to market that will benefit society.

BME 6086-020
BADM 5894-011
MGMT 5895-012

Designed to train future medical device entrepreneurs. Teams will be coached by industry experts who address fundamental topics in biomedical entrepreneurship. Business models will be presented to external experts for additional funding and awards. Ideal participants are graduate and advanced undergraduate students. Multi-disciplinary efforts between Schools of Engineering, Business, and Medicine. **3-credit course, offered Wednesdays 3-6pm.**

This is a multi-disciplinary effort between Schools of Engineering, Business, and Medicine, and the College of Liberal Arts & Sciences, and sponsored by the Connecticut Center for Entrepreneurship & Innovation.
